

Intellectual Studies Specialized Electives/Curriculum Majors

Please note that it is not mandatory to declare a major at The Akademia. The Intellectual Studies curriculum is designed to allow students to select specialized electives that support their personal vision without having to declare a major. Students will receive their degree in Liberal Arts and Sciences (with emphasis in their predominant field of interest). To declare a major, a student must use their specialized electives to fulfill the degree requirements for that major. Those students will receive their degree in that specified major.

An academic counselor (along with faculty) will guide each student through the four years to make sure that they receive the coursework required to achieve their personal vision and, where applicable, to fulfill the degree requirements for their major. Specialized electives and majors are available in the following fields:

- Aerospace Engineering
- African Studies
- Agricultural Engineering
- Agronomy
- Anthropology
- Archeology
- Architecture and Urban Design
- Art
- Art History
- Asian Studies
- Astronomy
- Astrophysics
- Atmospheric and Oceanic Sciences
- Audio Engineering
- Biochemistry
- Bioengineering
- Bioinformatics
- Biology
- Biomechanical Engineering
- Biostatistics
- Botany
- Business/Business Management
- Chemical Engineering
- Chemistry
- Chemistry and Materials Science
- Civil Engineering
- Communication Studies
- Community Studies
- Computer Engineering
- Computer Science
